

```

class Converter
{
    public static void main(String[] args)
    {
        String str = "123";
        int num = Integer.parseInt(str);
    }
}

// 123
public class Integer
{
    public static int parseInt(String s)
    {
        // Will convert the given String
        // into integer and return its value.
    }
}

```
